

Strategic Mentorship and Expert Guidance for Technological Innovation: Avadhoot Amrute's Journey with PTVAIM's COEI

Objective:

- To meet Dr. Premnath and discuss the development and prototyping of Mr. Amrute's technology.
- To meet Dr. Satishchandra Ogale and seek guidance on the project's theoretical aspects and prototype development.
- To discuss the project's progress and receive expert feedback.

Benefits:

- Activity provided Mr. Avadhoot Amrute with crucial insights and expert guidance for his technology's development.
- These activities suggested actionable steps, including applying for funding and developing a prototype and simulation.
- Mr. Amrute can now leverage new connections and resources to advance his project.

Description: PTVAIM's Centre of Entrepreneurship & Innovation (COEI) organised Exposure Series Activities for Avadhoot Amrute on 7th and 23rd August 2024 to gain mentorship and expert guidance for his project. These activities were strategically planned to provide him with opportunities to interact with experts in the field and gain valuable insights into his project.

Report on Strategic Mentorship and Expert Guidance for Technological Innovation: Avadhoot Amrute's Journey with PTVAIM's COEI

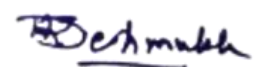

As part of the mentoring support and exposure series activities organized by PTVAIM's Centre of Entrepreneurship & Innovation (COEI), several key visits and meetings were conducted to aid Mr. Avadhoot Amrute, an incubatee at COEI, in the development of his innovative project.

On August 7, 2024, Mr. Amrute visited Venture Centre in Pune to meet Dr. Premnath. During this meeting, Dr. Premnath reviewed the project and emphasized the importance of building a prototype and developing a simulation to better understand the physics behind the technology. He suggested Mr. Amrute apply for funding through Nidhi Prayas for the prototyping, though funds for the current year were already allocated. Venture Centre, part of the NCL Innovation Park, has been an incubation hub since 2007 and provides various resources, including lab spaces, prototyping assistance, and quarterly workshops for incubatees across India.

Later that day, Mr. Amrute met with Dr. Satishchandra Ogale at IISER, Pune. Dr. Ogale, an expert physicist, immediately grasped the concept of the project and offered to provide further support. He proposed a Zoom meeting for in-depth discussions and suggested sharing a presentation with his team to assist with simulation development. Additionally, Dr. Ogale offered to help Mr. Amrute source Liquid Crystals for his prototype.

On August 23, 2024, Dr. J. B. Joshi also met with Mr. Amrute to provide further mentorship and guidance. These interactions were invaluable, offering Mr. Amrute crucial insights and resources to advance his project.
