Description: MIC conducted a webinar on Improving Ease of Doing Business, Reducing Compliance Burden on 1st October, 2021. Students and teachers got understanding of improvements to ease of doing business and reducing compliance burden.

Report on National Webinar on Improving Ease of Doing Business, Reducing Compliance Burden

Ministry of Education along with AICTE will be organized a webinar on the theme of 'Improving Ease of Doing Business, Reducing Compliance Burden' on 01 October, 2021. Shri. Jyotiraditya Scindia, Hon'ble Minister of Civil Aviation, Govt. of India, was the Chief Guest. Keynote Address was given by Shri Anand Deshpande, Founder, Chairman and Managing Director of Persistent Systems.

Mr. Deshpande gave a perspective of how things were in terms of starting and running a business in India post-independence. He emphasized on need for change and discussed the current changes that have been implemented. It was stated that the government has recently taken steps to cut compliance costs by simplifying, eliminating, and decriminalizing a number of regulations. In line with the same spirit, AICTE also re-engineered the system of approval. Accordingly, grant of approval to technical institutes is based on self-disclosure of information by the institute. The Technical Education Regulatory charges/ processing fees is also being handled in digital mode only.

It was mentioned that University Grant commission (UGC) has developed Digital Infrastructure for Knowledge Sharing (DIKSHA) user interface to enable learners and teachers across the country to access curricula of NCERT, CBSE and SCERTs online. 1.85 lakh pieces of e-content has been on-boarded and there has been high traffic on portal thus showcasing its increased usage. Training of teachers has also been enabled online on DIKSHA wherein approximately 25 lakh teachers have been benefitted across India.

Incorporation of the social media tools has become an effective medium in governance to understand & assess the new expectations, needs as well as shortcomings. Towards the end the speakers suggested that academicians as well as industry people should keep a note of such changes brought in by the government and sensitize others as much as possible.
