

Business Opportunities in the field of Waste Management By Mr. Ravi Ravariya (R Cube Recycling Pvt. Ltd.)

Date: 22nd August 2022

Objective:

To Celebrate “World Earth Day”

To make the students of PTVAs Institute of Management understand about the business opportunities in the field of Waste Management.

Benefits: The participants got a clear idea about the market size associated with the waste management sector & the various business opportunities in it.

Mr. Ravi Ravariya briefed the students about his company RCube Recycling Pvt. Ltd. He gave the students an idea about the entire waste management sector. He is currently working towards waste management in the printer cartridge recycling sector.

Ravi gave students information about the various government grants and funds available for working in the waste management sector. As per Ravi the waste management sector is a highly unorganized sector & government is looking for various registered waste management organizations. Atmanirbhar Bharat & Swatch Bharat Abhiyan have been a boon for the waste management industry.

Ravi gave us an idea about the licenses required to be a certified person in the field of Waste Management.

RCube is DPIIT-accredited startup helping to build India as a recycling hub for used printer cartridges. RCube’s Monthly Recycling Capacity is 45-50 tons of printer cartridge waste. Mr.Ravi Ravariya has received rps. 5 Lac grand from MIC India.

Ravi has now scaled up his business & is in talks with the French government to set up a plant in France. Currently has succeeded to expand his business into Bhutan.

Towards the end of the session Ravi gave the students an opportunity to work with him as full time employees which would help them to understand the industry in a better way.
